

De-Awner type SR - Diagonal

- Separation of awns and husks from grain and grass seeds
- Polishing of grain and grass seeds
- Automatic outlet flap shortens or extends the processing time, depending on whether an intense or light de-awning is necessary

Standard Construction

- Solid steel construction
- Shaft with square steel beaters
- Adjustable discharge flap
- Continuously adjustable to various capacities
- Large inspection hatch with safety switch
- V-belt drive and motor
- Control system for automatic capacity regulation (control box or components for existing control unit incl. module SPS-Simatic s7)
