

# Gravity Separators

type GA

- Separation of any kinds of kernels and granular products with nearly the same size according to the specific weight
- Size of kernels between 0,5 mm (fine seeds) and 20,0 mm (e.g. beans)
- Well balanced eccentric drive, very low dynamic loads

## Standard Design

- Aluminum deck with standard covering for grain, easy exchangeable
- Deck inclination adjustable (also during process)
- Each fan segment is controlled by an individual operating lever
- Continuous adjustable stroke length, eccentric rpm, air volume und deck inclination

## Options

- Deck with covering for smaller or larger seeds
- Partial or full dust hood

		GA 31	GA 71	GA 110	GA 210	GA 310
Capacity (Wheat)	t/h	2,0	4,0	6,5	10,0	15,0
Fan Drive	kW	3,0	4,0	7,5	11,0	15,0
Eccentric Drive	kW	0,55	0,55	1,1	1,1	1,1
Deck Size	m <sup>2</sup>	0,9	1,5	2,3	3,6	5,5
Air Requirement	m <sup>3</sup> /min	150	250	300	470	550
