

## Screen Cleaners type DELTA

### DELTA Super Cleaners – 100 Series

- High quality fine cleaning of malting barley, seed grain, legumes, grass and garden seeds
- Highly developed pre- and after suction system
- Capacity (fine cleaning of wheat): 2,5 – 30 t/h

#### Standard Construction

- Feeding unit with shaker feeder and adjustable feed gate
- Air lifting fan
- Highly developed pre- and after suction system
- Electronic control system for continuous adjustment of feeding unit and aspiration system
- Flexible screen flow
- Screen cleaning with rubber balls, efficient and free of maintenance
- Eccentric drive well balanced, very low dynamic loads

### DELTA Fine Cleaners – 110 Series

- High quality fine cleaning of malting barley, seed grain, legumes, grass and garden seeds
- Highly developed pre- and after suction system
- Capacity (fine cleaning of wheat): 2,5 – 30 t/h

#### Standard Construction

- Feeding unit with shaker feeder and adjustable feed gate
- Highly developed pre- and after suction system
- Electronic control system for continuous adjustment of feeding unit and aspiration system
- Flexible screen flow
- Screen cleaning with rubber balls, efficient and free of maintenance
- Eccentric drive well balanced, very low dynamic loads

## DELTA Screen Graders – 120 Series

- Cleaning and grading of malting barley, seed grain, legumes, grass and garden seeds
- Capacity (grading of wheat in 3 – 4 fractions with 95% correct size in each grade): 1,2 – 15 t/h

### Standard Construction

- Feeding unit with shaker feeder and adjustable feed gate
- Flexible screen flow
- Screen cleaning with rubber balls, efficient and free of maintenance
- Eccentric drive well balanced, very low dynamic loads

## DELTA Pre Cleaners – 140Series

- Pre cleaning of all cereals, maize, rape seed, peas
- Fine cleaning of malting barley and cereals
- Capacity (pre cleaning of wheat): up to 100 t/h
- Capacity (fine cleaning of wheat): 3 – 12 t/h

### Standard Construction

- Feeding unit with shaker feeder and adjustable feed gate
- Highly developed pre- and after suction system
- Screen section with scalping, pre- and grading / sand screens
- Execution with / without adjustable screen inclination
- Screen cleaning with rubber balls, efficient and free of maintenance
- Eccentric drive well balanced, very low dynamic loads
